

VACANCY

Manufacturing Engineer

Hobart Manufacturing UK, suppliers of commercial catering equipment, have a new staff position within the engineering department based in the Barnstaple Business Unit.

Working within a small team providing day to day manufacturing support in our Food Equipment and Cooking Equipment business lines.

In the role you will provide key manufacturing support to all areas of the paint shop, machine assembly & test, machine shop operations and fabrication as well as working closely with engineering design for the introduction of new work to ensure consistency of product, for instance, designing and implementing in-house production tooling. You will assist in the introduction of new equipment and systems to increase the efficiency of the Plant and devise methods of increasing productivity and decreasing waste. Furthermore, you will have a responsibility for maintaining and producing production documentation such as BOM's, routings and detailed work instructions.

Experience and an understanding of following disciplines will be beneficial to the role:-

- Knowledge of CAD/CAM systems
- Continuous improvement
- Value Engineering
- Understanding of general Milling, Turning and Grinding philosophies
- Sheet metal fabrication
- Strong communication skills and the ability to build productive business relationships - internally and externally
- Competencies in Microsoft software

Applicants should hold a HNC in Mechanical Engineering or equivalent. Additional training support will be provided to further develop the role.

Hobart offer excellent working conditions and a competitive package including Healthcare, Pension and a 37 hr/wk flexitime contract within the 4 ½ day week.

Applications in writing with an accompanying CV to Harry Condliffe, Plant Manager, Hobart Manufacturing UK, Barnstaple, EX31 1GD.

Applications Close 27/04/2025
