(550m.m. x 800m.m., MIN)

SPECIAL NOTE:
INSTALLATION MUST COMPLY WITH CURRENT GAS SAFETY REGULATIONS AND BS 6173.
ELECTRICAL INSTALLATIONS SHOULD COMPLY WITH CURRENT BS REGULATIONS.

DRAIN WATER/PIPE PURGING.

This automatically purges the pipe work after the tank is filled.

This purging produces a trickle of water which runs into the floor gully.

If this is not required:
- connect the outlet directly to drain using 8mm Internal diameter silicone hose
- block the outlet with an 8mm M4 setscrew

(note: the purge will no longer work)
